

CAPACITY
2x10L

CO₂ FLOWRATE
50 Kg/h

MAX PRESSURE
400 bar

MAX TEMPERATURE
150 °C

Co-solvent pump Yes

Separators 2 x 1L + 1 x 1L Cold trap
Automated extract collection

Automated valves for extraction vessel switching

Co-solvent pump and flow meters for accurate control

Specifications

PLC control, multidevice, thin client, automation

Unattended operation and Recipes

PERFORMANCE

Vessels	2 x 10L
Feedstock loaded per extraction vessel <i>Bulk density of 0,3</i>	2 x 3 kg
Time to process extraction <i>Loading/extraction/unloading</i>	4 hours
Number of extractions per day	3
Product mass per month <i>20 days a month</i>	360 kg
Product mass per year <i>12 months of production</i>	4 320 kg
Yield of extraction <i>depending on raw material</i>	up to 15% +
Raw oil extracted per year	up to 648 kg +
